

Asian Energy Security: The Maritime Dimension

Winners and losers by country

Clear 'winners' emerge when considering the impact at a national level. India and Japan, for example, could under these scenarios see an increase in GDP of between 4% and 7% by the end of the projection period (see Chart 7). Other net oil importers such as the US, China, Germany and the UK could also see GDP gains of the order of 2-5% of GDP in the long term due to lower global oil prices relative to a baseline with minimal shale oil.
