**Introducing non-medical prescribing and an inter-disciplinary Prescribing Governance Framework for all Prescribers in a rural Substance Misuse Team.**

**The Vision:**  
 Implementing non-medical prescribing within substance misuse treatment services, to increase equitable access and tackle health inequalities through flexible service delivery.  
 To meet the need for accessible high quality prescribing resources across a wide rural area.

**Interventions:**  
 • A Project Lead and clear plan.  
 • Used an innovative model to achieve Inter-disciplinary engagement and learning.  
 • Stakeholder mapping and engagement.  
 • Development and implementation of a Governance Framework for all Prescribers in the service, i.e. from 3 governance structures to one.  
 • A lean approach to the project (e.g. no additional bureaucracy or meetings; A4 one side summaries; e- forum) & PRINCE lite!

**Benefits achieved to date:**  
 • Inter-disciplinary Prescribing Governance Framework ratified and in operation.  
 • Non-medical prescribing went live without a hitch.  
 • Initial service user audit positive (n=122)  
 • Inter-disciplinary learning and audit processes established  
 • Accessible concise on-line information sources set up e.g. MEDS INFO buttons >

**Training workshops:** action learning, supervision etc...  
**Policies:** new research; evidence base; service user feedback etc...  
**Revisions to governance & policies,** learning from experience  
**Existing committees, forums, user groups**

**Service User Views pre-implementation**

Thought you were doing it already	Neutral
Get on with it!	Positive
	Prohibit and named a benefit
	Reservations
	Against

**Key messages:**  
 • Integrated high quality prescribing resources are much needed and will improve the patient's experience, reduce risks and can save money.  
 • Nurses, Pharmacists, Doctors and AHPs need to:  
 • work together on medicines management and prescribing  
 • use the NPC Prescribing Competency Framework for all Prescribers  
 • link up on governance and on education / CPD whenever appropriate.  
 This has become a model for new projects in other service areas (e.g. Paediatric Community Services)
